Education

Birla Institute of Technology, Mesra **2023 – 2027**
B.Tech in Computer Engineering *Ranchi, India*

Professional Experience

SDE Intern, CTO's Office **Aug 2026 – Present**
Valura.Ai *Bangalore, India*

- Auditing production services on a CMA-regulated AI investing platform; shipping internal Next.js tools and test scaffolding across TypeScript and Python ledger code so payment-to-portfolio state stays visible and safe to change.

Full-Stack Developer Intern **Dec 2025 – Feb 2026**
Morvion *Zurich, Switzerland (Remote)*

- Architected a request-to-quote marketplace (100+ daily leads, 50+ venues) and shipped production Venue, Organizer, and Admin dashboards.
- Built an LLM email classifier into an internal CRM (200+ threads), Stripe billing/webhooks, and dashboard analytics; closed production schema bugs to keep the platform stable.

AI/ML Engineer Intern **Jul 2025 – Sep 2025**
Hooman Digital LLP *Kolkata, India*

- Designed and shipped a scalable LLM pipeline extracting financial tickers from live market data at 98% accuracy, serving 400+ MAUs.
- Replaced WebSockets with SSE (40% lower infra cost) and built an AWS SQS + DynamoDB backend; used latency metrics to cut query time 15% while shipping with product.

Research Intern **May 2025 – Jul 2025**
Department of Computer Engineering, NIT Calicut *Calicut, India*

- Improved biometric classification accuracy 25% with CNN-Transformer fusion models on multi-channel EEG tensors (PyTorch).

Software Development Engineer Intern **Nov 2024 – Feb 2025**
OZI *Gurgaon, India*

- Built core MVP features for a production platform with 15,000+ products and 100K+ Android downloads; cut API latency 20% via query tuning, caching, and search/deep-link APIs.

Projects / Open Source

Biscuit – AI IDE | *Python, pytest, GitHub Actions, LangChain, React, Tree-sitter* *269 GitHub stars*

- Architected a modular microkernel IDE (source control, PTYs, extension marketplace) and LSP intelligence for 20+ languages, with 269 GitHub stars.
- Designed a pytest unit/functional suite (20+ modules) and GitHub Actions lint/test + CodeQL pipelines to automate quality gates and raise coverage.

Bagrry – AI Notepad | *TypeScript, Rust, Tauri, React, SQLite, MCP*

- Architected a local-first AI notepad (Tauri/React/Rust) with embedded SQLite, audio transcription, and LLM enhancement; exposed notes and search over a local REST + MCP API so the product works offline.

Achievements / Certifications

- Open source: 50+ PRs across Zulip, Prometheus Operator, and KubeVirt, including KubeVirt e2e test fixes that removed flaky CI timeouts.
- Monad Blitz Bangalore V4 (Top 10). Certifications: Meta Backend Developer, IBM Full Stack, Google Cloud AI Professional.

Technical Skills

Languages: Python, Go, Rust, TypeScript, C++, SQL, Bash
Frameworks: Django, FastAPI, Next.js, React, React Native, Tauri, gRPC, Protobuf, LangChain, Tokio, pytest
Cloud / Observability: AWS (SQS, EC2, S3, DynamoDB), Docker, Kubernetes, Kafka, GitHub Actions, OpenTelemetry, Grafana
Databases: PostgreSQL, CockroachDB, Redis, pgvector, Pinecone
